

FLOW

READING FLUENCY[®]

Flow Reading Fluency is a comprehensive, research-based program that not only shows teachers exactly how to improve reading fluency, but also provides them with all the student materials necessary to meet the needs of a wide range of learners.

FLOW READING FLUENCY

10 levels of fluency passages:
each level contains 24
nonfiction passages, for a
total of 240 passages.

All passages have
certified Lexile® measures.

FLOW READING FLUENCY

*Precisely
leveled texts
allow you to
differentiate
with ease!*

Each level of Flow Reading Fluency™ contains a specific range of leveled passages. There are 24 high-interest, nonfiction passages in each level. All of the passages have certified Lexile measures, so you can perfectly match them to your readers. The passage Lexile® measures increase in increments of 10, which allows you to expertly scaffold the program by increasing text complexity at a developmentally appropriate pace. There are two to three passages within the same Lexile® measure.

 Level 5: Flow Reading Fluency™ Lexile® Range: 500L-600L Word Count Range: 148-179				
#	Passage Title	Topic	Lexile® Measure	Word Count
1	Squeaky Clean	The History of Soap	500L	167
2	Life in the Taiga	Life in the Taiga	510L	170
3	Humming Fliers	Hummingbirds	510L	177
4	Hire a Goat	Goats Clearing Land	520L	171
5	Reading to Dogs	Reading to Dogs	520L	171
6	Beanie Baby Fever	Supply and Demand	530L	174

FLOW READING FLUENCY

High-interest passages that are specifically written for reading fluency

Each passage is carefully written and formatted for reading fluency. The texts include interrogative and exclamatory sentences so students can practice intonation changes. Italicized words also provide opportunities for students to improve prosody.

The passage level, passage number, and the passage Lexile® measure

Key vocabulary words and definitions that are essential to understanding the passage; the definitions are carefully written using student-friendly language.

After reviewing key vocabulary and before the cold reading, students will write a short prediction about the passage.

Key vocabulary words and vocabulary words for questions 3 and 4 are in bold.

The number columns indicate the cumulative word count above each line. To calculate the number of words read, continue counting from the column number until you reach the last word read.

Squeaky Clean

Level: 5
Passage: 1
Lexile®: 500

Review Key Vocabulary

germs Germs are tiny living things that cause illnesses.

illnesses Illnesses are states or conditions that cause the body or mind to not work right.

ashes Ashes are pieces of soft gray powder that are left when wood or certain other things are burned.

popular Popular means liked by many people.

Make a Prediction

Read the Passage

Where would we be without soap? We wash our hands and bodies with it. We use it to get our dishes and clothes clean. Since the 1800s, we've known that **germs** cause many **illnesses**. Soap helps stop germs from **spreading**. Soap has been used for thousands of years. The first soap was a mix of boiled animal fat and **ashes**. Long ago, a Greek doctor said that people should use soap. He said it would keep them clean and healthy.

Staying clean was **popular** during Roman times. Roman **rule** ended over 1,500 years ago. After that, soap was not used as much. Many illnesses spread during that time.

Over the years, people started making different kinds of soaps. However, they cost a lot. Most people didn't have enough money to buy them. Since that time, people have learned new ways to make soap. It is made in factories and doesn't cost much. Soap is a simple part of our world. But it makes such a big difference!

Date:	words read:
	- errors:
	= cold score:

My Goal:	Date:	words read:
		- errors:
		= hot score:

© Flow Reading Fluency™ 2019 • www.FlowReadingFluency.com

After the cold reading, students will subtract the number of errors from the total words read to find their cold score. Next, the students compute their goal. The "hot score" is added after the hot timing.

FLOW READING FLUENCY

Comprehension questions cover a variety of skills.

Each passage comes with a set of comprehension questions. The questions are expertly written to cover a variety of skills: determining the main idea, attending to details, using context clues, making inferences, and finding connections within various relationships.

Question 1

focuses on the main idea of the passage.

Question 2

asks students to recall a detail from the passage.

Questions 3 & 4

requires students to use context clues to determine the meaning of a word in the passage.

Question 5

requires students to use inferential thinking to answer. Students must merge clues from the passage with prior knowledge to make a conclusion.

Question 6

varies for each passage. It will either be an inference question (like Question 5), or it will focus on a relationship within the passage (like Question 7).

Question 7

focuses on various relationships: sequence, compare & contrast, problem & solution, cause & effect

Squeaky Clean

Level: 5
Passage: 1
Lexile®: 500

Answer the Questions

- What would be another good title for the passage?
 - Easy to Buy
 - Soap Saves Lives
 - A Greek Doctor
- According to the passage, what was the first soap made of?
 - boiled animal fat and ashes
 - crushed leaves and ashes
 - boiled animal fat and flower petals
- What does the word **spreading** mean in the passage?
 - to become sick
 - to reach a larger area
 - to wash one's body
- What is a synonym for the word **rule** in the passage?
 - laws
 - land
 - control
- Why do you think we now know that germs cause many illnesses?
 - People observed it happening in nature.
 - Scientists discovered that fact by doing experiments.
 - Sick people figured out what caused them to get sick.
- How did making soap in factories change the use of soap?
 - More people used soap because it cost less.
 - Fewer people used soap because they didn't make it themselves.
 - Factories didn't change the use of soap.
- According to the passage, what happened after Roman rule ended?
 - People started making different kinds of soaps.
 - Soap was first made in factories.
 - Soap was used less, and many illnesses spread.

Summarize the Passage

Passage Summary

The student will write a summary of the passage. Encourage students to write a summary that is 5-7 sentences.

FLOW READING FLUENCY

*Progress monitoring
that actively involves
and intrinsically
motivates students*

Students graph their performance for each passage they complete. This provides students with at-a-glance feedback on their progress as they move through the program. Students are genuinely motivated to "beat" their cold score and track their comprehension.

There are three different graphs:
Levels 1-4 (1 min.), Levels 5-10 (1 min.),
and Levels 5-10 (2 min.)

Students graph their cold reading and hot reading scores in the fluency graph using blue and red colored pencils, respectively. This graph also allows students to clearly see their growth over time.

Students record their cold scores followed by their goals for each passage. After the hot timing, students will add their hot scores.

After the teacher corrects the comprehension portion, the student (or teacher) shades in the correctly answered questions.

Review Key Vocabulary

tracks Tracks are very long pieces of metal that trains ride on top of.

steam Steam is a cloud of hot drops of water that is made when water is boiled.

engines Engines are machines that change energy, such as heat from burning something, into motion.

Make a Prediction

Read the Passage

Trains have wheels. Trains move on **tracks**. They carry things.

They carry things far away.

Long ago, horses pulled trains. Then **steam engines** made trains move. Now other engines make trains move.

Some trains carry people. Trains stop in cities. Some people get on. Other people get off. People buy food on trains. They look out the windows. They watch the land go by. They can sleep on trains, too.

Other trains carry things. Some things will be **sold** in stores. Other things will be used to build things.

Have you seen trains? Do you want to ride on one?

Date:	words read:

	= cold score:

My Goal:	words read:
	- errors:
	= hot score:

Answer the Questions

1. What is this passage mostly about?
 - a. what trains are like
 - b. where trains go
 - c. who works on trains
2. How did the first trains move?
 - a. Oxen moved them.
 - b. Horses moved them.
 - c. Engines moved them.
3. What does the word **sold** mean in the passage?
 - a. traded for other things
 - b. given away for free
 - c. given to people who pay money
4. What is probably true about trains?
 - a. They go on city roads.
 - b. They make noise.
 - c. They go high in the sky.
5. What are the two kinds of trains?

FLOW READING FLUENCY

Assisted-Reading Video Passages for all 240 passages

Each passage comes with an Assisted-Reading Video Passage. Students can follow along as they listen to an audio version of their passage. Each word is highlighted as it is read aloud.

Provide your students with fluency models and guided practice. These videos combine the power of visual and audio support to improve reading fluency. They are perfect for independent practice or centers.

Students quickly access these on a tablet or Chromebook using a QR code. No software or student logins needed!

The text highlighting is especially useful for students who struggle with text tracking.

The Miracle of Kamaishi

Many places around the world are at risk for extreme nature events that can put people in grave danger. **Communities** have plans that help people prepare for situations such as hurricanes, floods, and earthquakes. People watch TV, listen to the radio, or receive text messages letting them know when to leave an area or take other measures to be safe. Children usually wait for instructions from adults. But what if *not* waiting could save your life? Could you make such a decision on your own?
