WORD ANALOGIES for Vocabulary Development

Why should I use word analogies with my students?

Word analogies are one of the most effective ways to build vocabulary while simultaneously developing critical thinking skills. Unlike vocabulary activities that require students to memorize word definitions, word analogies develop a deep understanding of a word meaning by exploring the relationships between words. When students form logical connections between words, they create a mental network of ideas, which deepens understanding and increases retention. While solving word analogies, students are contextualizing the words as they search for word relationships.

When students work with analogies, they...

- expand and deepen their vocabulary.
- understand the relationships between ideas and words.
- recognize and understand multiple-meaning words.
- think critically and apply logical reasoning.
- learn to decipher word meanings based on context.
- build a network of understanding that improves retention and aids future learning.

What is included in this resource?

This resource is PACKED with materials that will allow you to effectively use word analogies with your students. You will be provided with tools to break down word analogies in a scaffolded manner so that your students are successful from the very beginning. There are several versions of the materials included which will allow you to perfectly differentiate to meet the needs of your students.

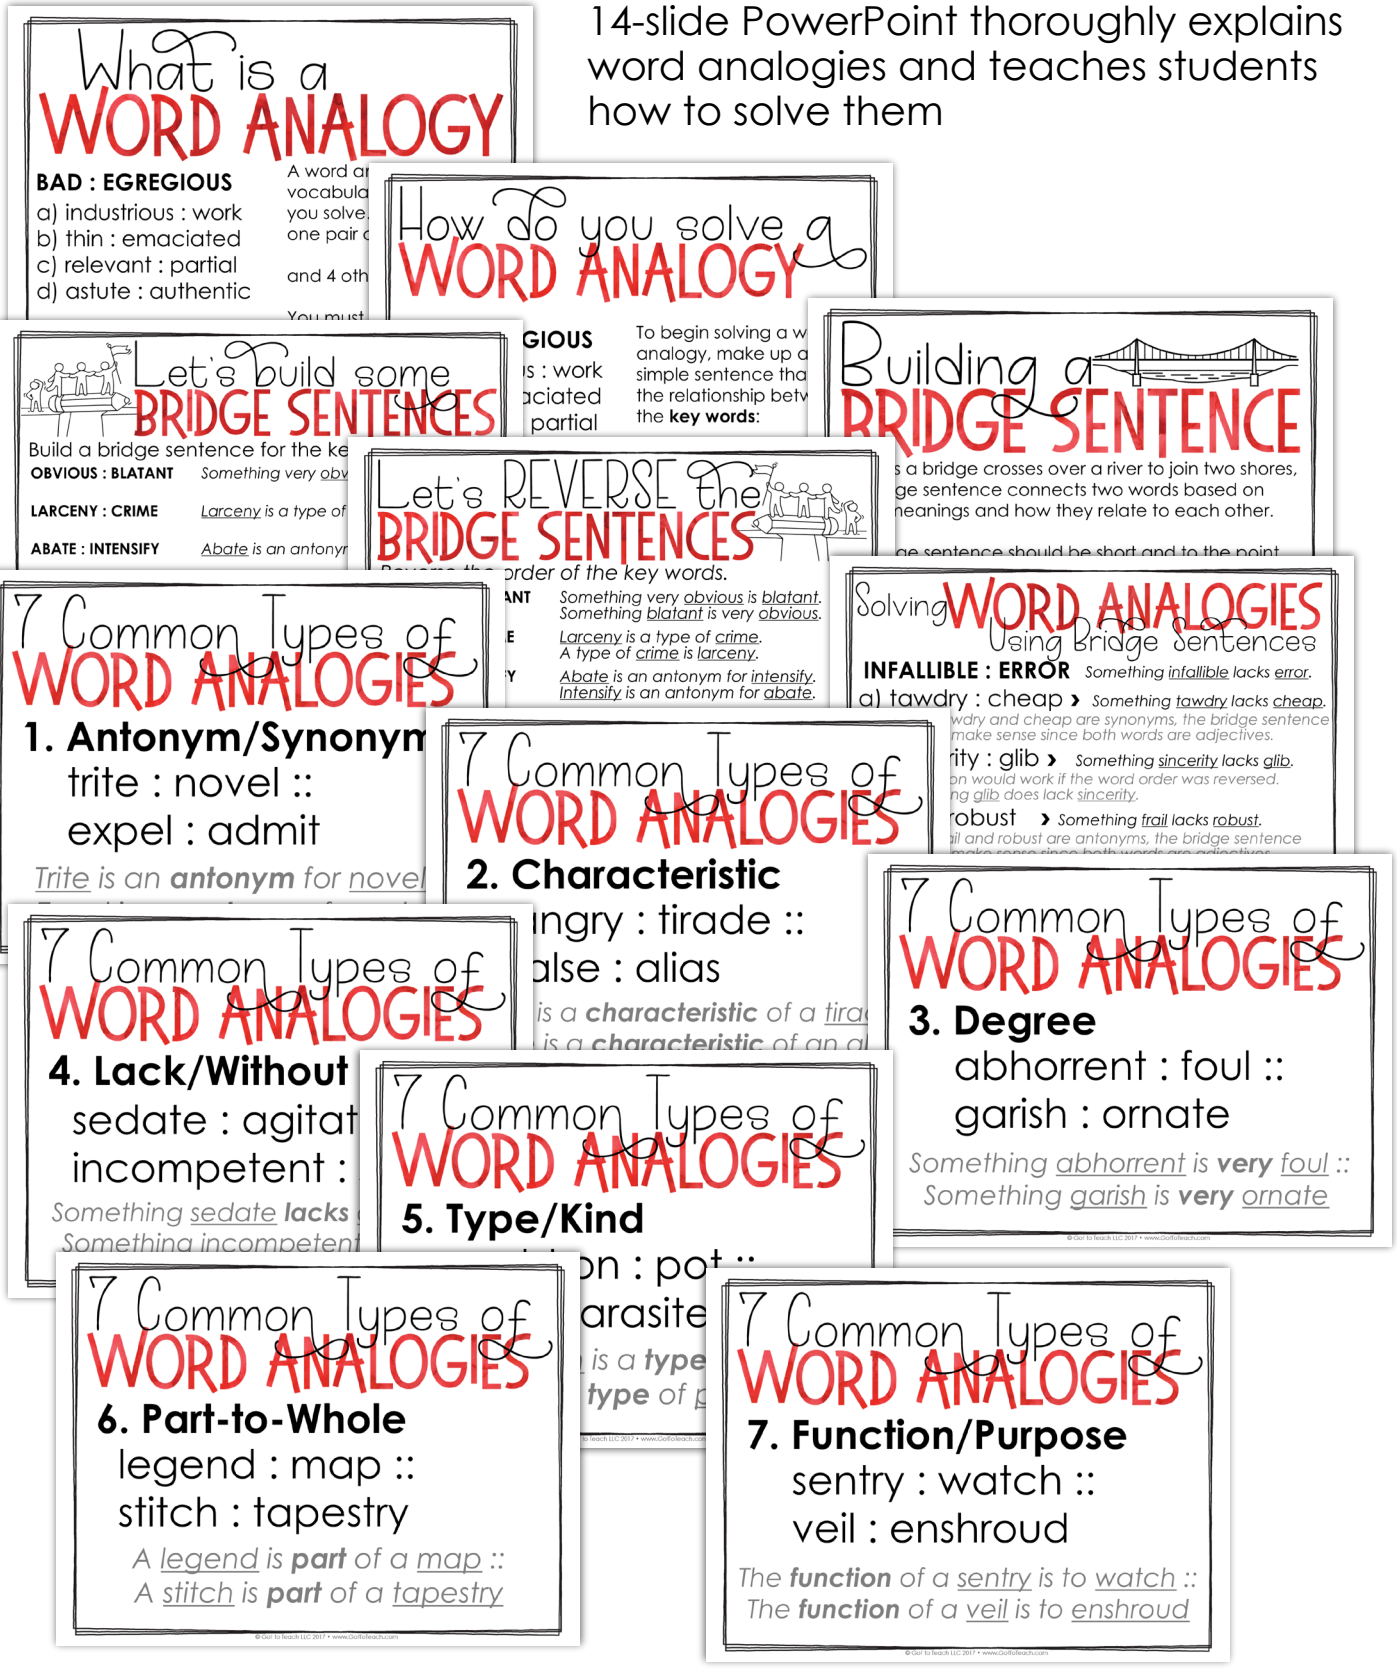

- **Instructional PowerPoint**: To be used for introducing word analogies and strategies to solve them
- **150 word analogies**: These have been expertly crafted using Tier Two words. Tier Two words for this level are approximately at a tenth-grade level. Note: There are no grade level labels (you will only see "Level 10") on these materials, which means you can use them with any grade. These word analogies are organized in 15 sets of 10 (10 analogies per set).
- **Leveled Printables**: The included printables are provided in four different formats to allow you to deliver the exact level of support your students need.
- **Task Cards**: The analogies are also provided in task card format.
- **Google Classroom Version**: Each of the 15 sets is available as a Google Form quiz for those teachers using Google Classroom/Google Drive.
- **Teaching Notes**: Tips, tricks, and instructional rationale are provided for every component.

WORD ANALOGIES for Vocabulary Development

TIPS FOR IMPLEMENTATION

- Use the included PowerPoint to introduce word analogies to your students. You may want to have your students write their own bridge sentences for slide 4, before showing them the examples that are provided.

- Since the key words in an analogy can be transposed (KNIFE : CUT or CUT : KNIFE), students must also be taught how to write a "reverse" bridge sentence. Slide 5 of the PowerPoints provides examples. This may be something you want your students to practice as well.

- Bridge sentences allow the students to provide context to the words in order to determine their relationship. They do not need to be "perfect" sentences, and it is okay if they sound a bit awkward (e.g. *A **characteristic** of the sun is that it is hot*).

- Bridge sentences can vary.
  *The **function** of a knife is to cut.* **-and-** *A knife is **used to** cut.*
  Both of the preceding sentences are acceptable as they express the same relationship.

- If two answers seem correct in an analogy, that is a signal that the bridge sentence used to solve it may need to be tweaked a bit. This will often be the case when the relationship between the key words is a little more complex than originally perceived. Remind students that they are looking for the "best" match and to revisit their key-word bridge sentence.

- Each set of analogies consist of 10 analogies. Seven of these analogies are based on the seven different types outlined in the PowerPoint (*Antonym/Synonym, Characteristic, Degree, Lack/Without, Type/Kind, Part/Whole, and Function/Purpose*).

- The remaining three analogies in each set are categorized as "other." These analogies express a variety of other relationships and allow students to stretch their thinking beyond the seven common types of analogies. Some examples of "other" relationships are homophones, spelling and grammar, cause and effect, sound and actions, places… etc. Slide 14 provides a few examples of such analogies.

- To smoothly transition students from Version 1 to Version 2 of the printables, you can combine both. Print page one of Version 1 (problems 1-5) on one side of the paper, and then print page two of Version 2 (problems 6-10) on the reverse side. You can also do this when transitioning students from Version 2 to Version 3.

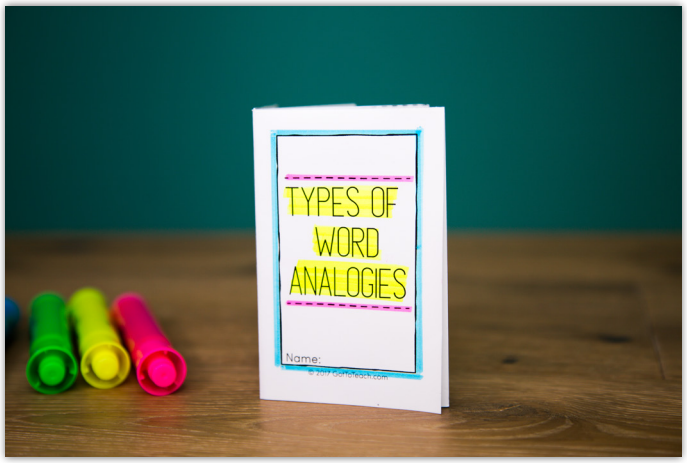

- Provide students with opportunities to discuss and explain the various relationships between words within the analogies, like what you see on slide 6 of the PowerPoint. When students discuss why and why not certain word pairs match the key words, they are contextualizing the words in a meaningful way.

WORD ANALOGIES for Vocabulary Development

ACCESSING GOOGLE FORM QUIZZES

This page contains all the links for accessing the Google Forms versions of the analogy sets. When you click on these links, you will be taken to a "force copy" Google Sheets page. Once you copy the Google Sheet to your Google Drive, you will be able to access the Google Form Quiz. More instructions are included on the following two pages.

WORD ANALOGIES for Vocabulary Development

ACCESSING GOOGLE FORM QUIZZES

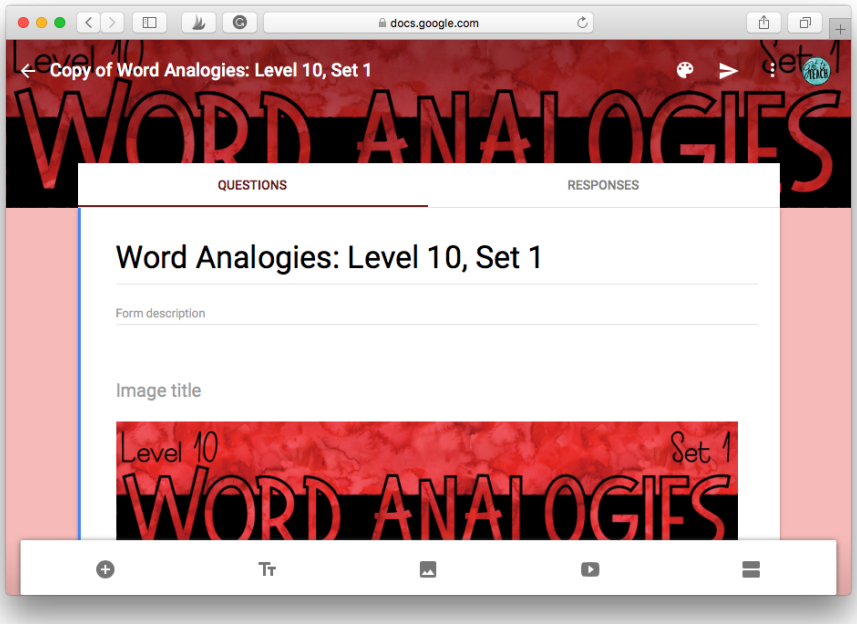

Step 1: Click on a link from the previous page.

Step 2: This link will take you to a "Force Copy" Google page. This just means you have to copy the file to your Google Drive before you can open it.

Step 3: The Google Form that you will assign your students will be saved in your Google Drive.
